

SWISS Senses cabin interior Facts and figures

SWISS Senses

The new experience on long-haul flights

SWISS Senses is the new long-haul experience of the Airline of Switzerland – developed to redefine every aspect of traveling with SWISS. While SWISS Senses extends far beyond the seat, the state-of-the-art cabin interior remains its centerpiece – setting a new benchmark for comfort, design and personal well-being. The new cabin will be introduced later this year on the new Airbus A350-900, followed by a gradual rollout across the Airbus A330 and Boeing 777 fleets.

The redeveloped cabin embodies Swiss quality and precision – creating a space where form meets function, style meets comfort and tradition meets innovation. Its introduction marks a milestone in the history of the SWISS long-haul fleet and the beginning of a new era in air travel.

Key highlights of the new SWISS Senses cabin interior

- Future unique four-class configuration on every SWISS long-haul aircraft
- Complete redesign of the cabin across all classes: SWISS Economy, SWISS Premium Economy, SWISS Business and SWISS First
- Timeless design concept with warm tones such as anthracite, beige and bordeaux, paired with premium materials to create a calm and elegant atmosphere
- Human centric lighting to support the body's natural biorhythm and help reduce the effects of jet lag
- Private suites introduced for the first time in SWISS First
- Five individual seating options in SWISS Business including the new Business Suite for a personalized experience and higher comfort
- Next-generation inflight entertainment with larger screens and Bluetooth connectivity for personal devices

SWISS Economy and SWISS Premium Economy

More space for a relaxed journey

The modern SWISS Economy cabin offers travelers increased legroom and wider seats – for added comfort and more room to relax on long-haul flights. The travel experience is enhanced by a wide range of inflight entertainment options on a 13.3” 4K OLED screen – one of the largest in its class on a global scale. With integrated Bluetooth connectivity, guests can enjoy their entertainment using their own headphones – for a more personalized and seamless experience.

The popular SWISS Premium Economy continues to provide passengers with enhanced privacy and greater personal space to relax on long-haul flights. The spacious hardshell seat reclines effortlessly, allowing guests to sit back and unwind without disturbing others behind them. A privacy divider next to the headrest adds a sense of seclusion, while the large 15.6” 4K OLED screen with integrated Bluetooth connectivity and a wireless charging station in the armrest create a comfortable and personal travel experience.

Key features of the new SWISS Economy and SWISS Premium Economy cabin interior at a glance:

	SWISS Economy	SWISS Premium Economy

SWISS Business

Personalized comfort

Offering five distinct seating categories, the new SWISS Business cabin provides tailored comfort to suit every traveler's needs. All seats offer direct aisle access and combine modern functionality with thoughtful details. Innovative seat features such as an integrated heating and cooling system, complemented by a gently adapting shoulder comfort zone and

a spacious, well-structured cabin design ensure the highest level of personal well-being. USB-A and USB-C ports, an additional power outlet and a wireless charging station provide optimal connectivity, while a 4K OLED screen and a separate tablet for entertainment and seat controls complete the premium inflight experience.

SWISS First

A new level of privacy

With the Single Suite and Suite Plus, the redesigned SWISS First cabin sets a new benchmark in space, comfort and privacy. The fully enclosed suites offer an exclusive retreat – for one or two guests, depending on the chosen configuration. High-quality materials and timeless design elements create a calm atmosphere. A moveable ottoman, paired with an elegant

wooden dining table, allows for shared meals above the clouds. Individually adjustable seat heating and cooling, a personal wardrobe and a dedicated storage room for up to two pieces of hand baggage ensure the highest level of comfort throughout the journey. The experience is rounded off by a generous 4K OLED screen, delivering unique entertainment on board.
